QEI Partners with Odyssey Technical Solutions for Repair Services of Semiconductor Products

Leader in RF Delivery Systems Teams Up with World Leader in RF Repairs

Round Rock, Texas – May 19, 2021 – Odyssey Technical Solutions, world leader in RF, DC, and microwave repairs, is pleased to announce it has been selected as partners for repair services of all QEI semiconductor products. QEI is a leader in RF delivery systems located in Williamstown, New Jersey, that has made significant gains in the semiconductor market worldwide, after many successful years within the broadcast industry. With a history spanning twenty years and nearly 100,000 successful repairs, Odyssey was the clear choice for partnership with QEI.

“To support our global systems installed base, we chose Odyssey to be our partners for repair in the US, Europe, and Asia. We, at QEI, believe this *first-of-its-kind* relationship was the right way to grow and support our critical customers and to meet their expectations. QEI could have chosen to set up service centers worldwide; but we preferred to work with a professional service organization like Odyssey, who could help us achieve an immediate quality repair loop worldwide,” remarked QEI representative, Scott Ivins.

Eric Nail, vice president of Odyssey added, “We are very pleased to align ourselves with QEI; as they gain design wins, we gain repair customers for the future. To establish a relationship

between manufacturer and the repair process is smart business for a seamless customer experience. With our locations in Round Rock, Singapore, and our newest in Nijmegen, The Netherlands, Odyssey is well positioned to provide QEI customers the highest quality repair service worldwide.”
